Project Purpose:

- Recruitment management platform for student-athletes that centralizes national basketball programs and streamlines communication tracking to optimize athletic recruitment process

Features:

- Email management
- User profile
- Coach & School profiles
- Tagging & Filtering
- Bulk Actions

Lessons:

- User credentials have extremely in-depth requirements
- The process of migrating from local authentication to production authentication
- Scalability is a potential risk since the client’s database has yet to be implemented
